

1. Create Directory

```
$ mkdir lab2ly  
$ cd lab2ly
```

2. Copy existing code to this directory.

```
$ cp .../some-path/main.py .  
$ cp .../some-path/mi_to_km.py .
```

3. Rename file so that it is ly_to_mi.py

```
$ mv mi_to_km.py ly_to_mi.py
```

4. Edit file to update it.

5. Run and test file.

6. If broken back to step 4

7. Do this again for feet_to_tbunits.py

8. Answer the "lab"'s 10 questions - write it up in a .txt using VI or VSCode and turn in the .py files (4) and the lab (1)
